Education

Vidyalankar School Of Information Technology (VSIT)	Aug 2023 - May 2026
Bachelor Of Science - Information Technology	
CGPA - 9.6	

Summary

Full-Stack AI Engineer experienced in architecting end-to-end applications that bridge robust web frameworks with sophisticated machine learning models. Specialized in building scalable data pipelines and deploying production-ready AI solutions to solve complex business challenges.

Professional Experience

Fundora AI/ML Intern	Jun 2025 - Dec 2025
- An early-stage startup required a data-driven personalization strategy but lacked both a structured dataset and a functional model to power its decision-making. - I was responsible for the entire data lifecycle—from raw collection to model development—creating a "deployment-ready" recommendation engine to drive future user engagement. - I built production-ready pipelines using Python and Apify to extract 5,000+ records, then engineered a custom preprocessing suite with Pandas and NumPy to ensure 100% schema consistency. Finally, I designed and trained a foundational recommendation engine using Scikit-learn, implementing collaborative filtering to match users with relevant platform content. - Successfully delivered a validated model that achieved an 85% precision rate in offline testing. This established a scalable data architecture that reduced manual processing time by 60% and provided a high-performance baseline for the platform's launch.	

Acmegrade Machine Learning Intern	May 2024 - Jul 2024
- Needed to develop high-precision predictive models for medical diagnostics and content discovery using diverse datasets. - Architected end-to-end ML pipelines, focusing on rigorous statistical validation and NLP-driven recommendation logic. - Executed EDA, scaling, and dimensionality reduction using Pandas and Seaborn. Developed a diagnostic pipeline comparing SVM, Random Forest, and Logistic Regression, and built a movie recommender using TF-IDF and Cosine Similarity. Validated performance through cross-validation and ROC-AUC analysis. - Achieved 90%+ accuracy in diagnostic classification and optimized models for maximum Precision and Recall, delivering production-ready frameworks for both classification and recommendation use cases.	

Skills

Languages & Web - Python, HTML, CSS, Javascript, React.js, Tailwind
Backend - Express.js, Node.js
Database - MySQL, MongoDB
AI & ML - NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, SHAP, LIME, Tensorflow
Tools & Platform - VS Code, Vercel, Render, Git & GitHub

Projects

AI Visa Success Advisor
- International students face high visa rejection rates due to inconsistent document preparation and lack of personalized interview guidance. - Build an automated, full-stack platform to analyze application data and provide real-time, "dual-intelligence" feedback. - Architected a React/Tailwind frontend and a Node.js/Python (FastAPI) backend. Integrated Gemini LLMs to extract structured JSON from documents and implemented a scoring algorithm for success probability. - Delivered a responsive MVP that generates automated PDF reports, providing a scalable solution that streamlined the preparation process and achieved high-accuracy success scoring.

Veri-Fake AI
- The rapid proliferation of AI-generated misinformation and highly realistic synthetic media created a critical need for accessible tools to verify the integrity of digital content. - Architected a scalable end-to-end platform to process heavy video/image files and deliver real-time authenticity analysis. - Developed a custom detection model trained on 1,000+ Kaggle-sourced video and image samples. Built a React 18 frontend with custom polling hooks and a FastAPI backend to leverage asynchronous processing for media-heavy ML workloads. - Successfully delivered a responsive MVP that achieved a 58% training accuracy on complex synthetic data, providing a functional, high-speed framework for real-time authenticity scoring and verification.

Certifications & Achievements

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Oracle
- MongoDB Course Certificate - MongoDB University
- Intro To IoT Certificate - Cisco Networking Academy
- AWS Cloud Foundation - AWS Academy

Achievements

- Winner | SIH Intercollege Round
- National Finalist | Hackcrypt Hackathon
- Finalist | Tantravihar 2026
- Zonal Qualifier | Aavishkar Research Convention
