Education

Vidyalankar School Of Information Technology (VSIT)

Aug 2023 - May 2026

Bachelor Of Science - Information Technology
CGPA - 9.6

Professional Experience

Fundora | AI/ML Intern

Jun 2025 - Dec 2025

- Scraped and collected 5,000+ structured records from Apify and online sources using Python, building production-ready data pipelines tailored for ML workflows.
- Engineered and preprocessed datasets using Pandas and NumPy — handling cleaning, organization, and feature preparation for analytical and machine learning use cases.
- Designed and trained a foundational recommendation engine using Scikit-learn, contributing to the platform's core data-driven decision-making capability.
- Collaborated within a fast-paced startup environment, applying rigorous problem-solving and technical ownership across high-impact data tasks.

Acmegrade | Machine Learning Intern

May 2024 - Jul 2024

- Built a supervised ML pipeline for cancer diagnostic classification — evaluated Logistic Regression, SVM, and Random Forest models achieving 90%+ test accuracy through cross-validation and ROC-AUC analysis.
- Engineered a content-based movie recommendation engine using TF-IDF Vectorization and Cosine Similarity for NLP-driven user preference matching.
- Applied end-to-end ML workflows including EDA, feature engineering, statistical scaling, dimensionality reduction, and performance validation (Precision, Recall, F1-score) using Scikit-learn, Pandas, NumPy, Matplotlib, and Seaborn.

Skills

Languages & Web - Python, HTML, CSS, Javascript, React.js, Tailwind

Backend - Express.js, Node.js

Database - MySQL, MongoDB

AI & ML - NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, SHAP, LIME, Tensorflow

Tools & Platform - VS Code, Vercel, Render, Git & GitHub

Projects

AI Visa Success Advisor

- Developed a full-stack AI-driven platform to reduce visa rejection rates by providing automated document analysis and interview preparation.
- Built a secure, multi-service architecture to process complex visa application data and provide real-time, context-aware guidance via a "Dual-Intelligence" layer.
- Architected a React/Tailwind frontend and a hybrid Node.js/Python (FastAPI) backend, integrating Gemini LLMs to generate structured JSON analysis from user documents.
- Deployed a responsive MVP featuring automated success-probability scoring and exportable PDF reports, streamlining the visa preparation process for international students.

Veri-Fake AI

- Developed a full-stack deepfake detection platform to identify synthetic manipulations in uploaded image and video files.
- Engineered a scalable system to bridge complex ML analysis with a user-friendly interface, ensuring seamless media processing.
- Built a React 18 frontend with custom polling hooks and a Python/Flask backend to manage asynchronous analysis workflows.
- Delivered a responsive MVP that provides real-time authenticity scores and confidence levels for digital media verification.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Oracle
- MongoDB Course Certificate - MongoDB University
- Intro To IoT Certificate - Cisco Networking Academy
